

Small-Mid Cap Core Portfolio

Third Quarter 2017

Portfolio Review

The Small-Mid Cap Core portfolio underperformed the Russell 2500 Index during the third quarter. The underperformance was primarily driven by negative stock selection in the health care and financial services sectors. Positive stock selection in the materials and processing and consumer discretionary sectors contributed the most to performance.

In the third quarter, the biggest contributors to performance were RBC Bearings and WABCO Holdings. RBC Bearings' stock outperformed, as the company benefited from an influx of commercial aircraft deliveries, a rebound in industrial end-markets and an improving margin profile. WABCO's shares increased during the quarter after the company reported sales results that were above expectations and management increased its profit guidance for the year. WABCO is benefiting from new safety standards implemented in key markets like the U.S. and China and an improving economy in Europe.

Positions that detracted the most from performance during the quarter were Signature Bank and Equifax. Signature Bank's shares were under pressure in the recent quarter as the flat yield curve and interest rate increases by the Fed have compressed the net interest margin of the bank. In addition, increased loan prepayments have made management cautious about hitting their net loan growth targets for the year. Despite these near-term headwinds, Signature remains one of the most efficient banks in the U.S., with loan growth and profitability metrics that are well-above peers. Equifax's shares declined sharply after the company disclosed a massive cybersecurity breach with criminals having gained access to personal information of roughly 143 million U.S. consumers. We are disappointed not just by the vast scale of the breach, but also by its duration and an over a month-long disclosure lag. Even assuming the best case scenario of a "contained" outcome, it is clear that the company will remain under significant pressure in the near-to-medium term due to additional investment in data security infrastructure, potential litigation liability, increased regulatory oversight and negative media coverage. We sold our position during the quarter.

Purchases and Sales

During the third quarter, we purchased Copart and Teradyne, and sold our positions in Church & Dwight, Equifax (see rationale above), Factset Research Systems and Monotype Imaging.

Copart is the largest provider of auction services for salvaged (totaled) vehicles. The company primarily acts as an agent, collecting fees from both buyer and seller, while not taking ownership of the car. Copart has achieved critical mass where both buyers and sellers have their needs met, which attracts additional buyers and sellers to the auction platform, further strengthening the network.

Teradyne manufactures and sells automatic test systems used to test semiconductors, wireless products, data storage and complex electronic systems in the consumer electronics, wireless, automotive, industrial and aerospace and defense industries. The company has also recently entered into selling collaborative robots (cobots)—highly programmable automation equipment that can be used by global manufacturing and light industrial customers to help improve quality, increase manufacturing efficiency and reduce costs.

We sold Church & Dwight as we are concerned with what appears to be a strategic shift in the management team's approach to capital allocation.

We sold Factset Research Systems as its organic revenue growth has been moderating recently, as more active manager customers shut down or become increasingly cost-conscious amid the market's continued shift toward passive investing. Further, continuously falling technology costs have invited capable, aggressively-priced competition from both smaller and larger players.

We sold Monotype Imaging as the company once again lowered its guidance for its acquired business, Olapic. The lower guidance for Olapic was attributed to the revenue recognition similar to the SaaS recognition. However, the fact that the company just realized this after almost a year of Olapic ownership speaks to the fast-changing nature of the industry that Olapic competes, and thus gives us less conviction in the long-term operating model of this new business segment.

Outlook

On balance, the outlook for equities continues to be favorable. Any meaningful uptick in inflation caused by either higher energy prices or significant wage growth is the principal risk in the outlook for the stock market. We will continue to monitor inflationary trends closely over the next couple of years. Geopolitical events, such as hurricanes and tensions with North Korea, have taken a back seat to the improving global earnings outlook so far this year. With the stock market at all-time highs, we believe it is important for clients to focus more than ever on their longer-term goals and risk tolerance, as market corrections can and do occur frequently—even in bull markets. With such unpredictability, we recommend that clients do not try to time the market, as most often investors fail severely in this endeavor and hurt their returns.

Small-Mid Cap Core Portfolio

Third Quarter 2017

Disclosure

Kayne Anderson Rudnick Investment Management, LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS® standards. Kayne Anderson Rudnick Investment Management, LLC has been independently verified for the period from January 1, 1999 through December 31, 2015.

Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS® standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS® standards. The Small-Mid Cap Core Composite has been examined for the period from January 1, 1999 through December 31, 2015. The verification and performance examination reports are available upon request.

Kayne Anderson Rudnick Investment Management, LLC, a wholly owned subsidiary of Virtus Investment Partners, Inc., is a registered investment advisor under the Investment Advisers Act of 1940. Registration of an Investment Advisor does not imply any level of skill or training. Kayne Anderson Rudnick Investment Management, LLC manages a variety of equity and fixed-income strategies focusing exclusively on securities the firm defines as high quality.

The composite includes all fully discretionary institutional and pooled Small-Mid Cap Core Portfolios. Small-Mid Cap Core Portfolios are invested in equity securities with market capitalizations consistent with the Russell 2500™ Index, that have market control, rising free cash flow, shareholder-oriented management, strong consistent profit growth and low-debt balance sheets. For comparison purposes, the composite is measured against the Russell 2500™ Index. The Russell 2500™ Index is a

market capitalization-weighted index of the 2,500 smallest companies in the Russell Universe, which comprises the 3,000 largest U.S. companies. The index is calculated on a total-return basis with dividends reinvested. Benchmark returns are not covered by the report of the independent verifiers. The composite was created in July 2000. A list of composite descriptions and policies for valuing portfolios, calculating performance and preparing compliant presentations are available upon request.

Prior to January 1, 2011, the composite minimum was \$250,000. Prior to January 1, 2011, accounts that experienced a significant cash flow, defined as aggregate flows that exceeded 25% of the account's beginning of period market value, were temporarily removed from the composite. From July 1, 2000 to December 31, 2010, only non-taxable Small-Mid Cap Core Portfolios are included in the composite. As of January 1, 2011, the composite was redefined to include both taxable and tax-exempt accounts.

This composite contained 0.23% non-fee-paying portfolios as of December 31, 2013, 0.7% non-fee-paying portfolios as of December 31, 2014, 0.7% non-fee-paying portfolios as of December 31, 2015 and 0.5% non-fee-paying portfolios as of December 31, 2016.

The standard management fee schedule currently in effect is as follows: 0.90% for the first \$25 million; 0.80% on the next \$25 million; 0.75% on the next \$50 million; 0.60% on the balance. Prior to January 1, 2013, the standard management fee schedule in effect for this strategy was as follows: 0.85% for the first \$25 million; 0.70% on the next \$25 million; 0.60% on the next \$50 million; 0.50% on the balance. Actual management fees charged may vary depending on applicable fee schedules and portfolio size, among other things. Additional information may be found in

Part 2A of Form ADV, which is available on request. The performance information is supplied for reference. Past performance is no guarantee of future results. Results will vary among accounts. The U.S. dollar is the currency used to express performance. Returns are presented net of transaction fees and include the reinvestment of all income. Gross returns will be reduced by investment management fees and other expenses that may be incurred in the management of the account. Model net returns have been calculated by deducting 1/12th of the highest tier of the standard management fee schedule in effect for the respective period from the gross composite returns on a monthly basis. Prior to January 1, 2011, the highest tier assumed of the standard management fee schedule for this product was 1.00%.

Internal dispersion is calculated using the asset-weighted standard deviation of annual gross returns for accounts in the composite for the entire year. For those years when less than five accounts were included for the full year, no dispersion measure is presented. The three-year annualized ex-post standard deviation measures the variability of the composite (using gross returns) and the benchmark for the 36-month period ended at the following dates:

3-Yr Annualized Standard Deviation (%)

	December 31	Composite	Benchmark
2011		18.53	23.73
2012		15.19	19.24
2013		12.17	15.85
2014		10.27	11.84
2015		12.23	12.59
2016		12.63	13.86
